

#sruthi - how many different product categories are shipped each month

```
SELECT COUNT(shipment_id), product_category
FROM shipment_table st
LEFT JOIN product_dimension_table pt
ON pt.product_key = st.product_key
GROUP BY product_category
```

#Sayed - find the shipping cost, and warehouse for a sale in july to america

```
SELECT shipping_cost, warehouse_name
FROM shipment_table st
INNER JOIN location_dimension_table ldt
ON ldt.location_key = st.arrive_location_key
LEFT JOIN warehouse_dimension_table wdt
ON wdt.location_key = ldt.location_key
LEFT JOIN date_dimension_table ddk
ON ddk.date_key = st.date_key_arrival
WHERE ldt.country = 'America'
AND ddk.month = 'July'
```

Ana - how many products were shipped to Brazil

```
SELECT count(st.shipment_id) AS products_shipped_to_brazil
FROM shipment_table st
LEFT JOIN location_dimension_table ldt
ON ldt.location_key = st.arrive_location_key
WHERE ldt.country = "Brazil"
```

Aimun -most profitable 3 quarters and top 3 years of manufacturing - need to add transactional data first

```
SELECT sum(profit), quarter
FROM shipment_table st
JOIN date_dimension_table ddt
ON st.date_key_arrival = ddt.date_key
GROUP BY quarter
ORDER BY sum(profit) DESC
LIMIT 3
```

```
SELECT year, sum(profit) AS total_profit
FROM shipment_table st
LEFT JOIN date_dimension_table ddt
ON st.date_key_arrival = ddt.date_key
GROUP BY year
ORDER BY total_profit DESC
LIMIT 3
```

Ganesh- can you get the monthly report of shipments categorized by product, carrier, location ?

```
SELECT product_name, count(product_name), carrier_name, country, month
FROM shipment_table st
LEFT JOIN date_dimension_table ddt
ON st.date_key_arrival = ddt.date_key
LEFT JOIN product_dimension_table pt
ON pt.product_key = st.product_key
LEFT JOIN location_dimension_table ldt
```

ON ldt.location_key = st.arrive_location_key

LEFT JOIN carrier_dimension_table cdt

ON cdt.carrier_key = st.carrier_key

WHERE year = 2026

GROUP BY month, product_name, carrier_name, country

not the most concise output, but only way i could think of that would display all the info that was required

#sreeni - Top seller Warehouse report

SELECT

wdt.warehouse_name,

COUNT(*) AS arrival_count

FROM shipment_table st

LEFT JOIN location_dimension_table ldt

ON ldt.location_key = st.arrive_location_key

LEFT JOIN warehouse_dimension_table wdt

ON wdt.warehouse_key = ldt.warehouse_key

WHERE st.date_key_arrival IS NOT NULL

GROUP BY wdt.warehouse_name

ORDER BY arrival_count DESC

LIMIT 1;
