Write a shell script with a shebang line, at least two variables, an if/else condition, and a for loop that processes a list of filenames.

```
folder="notes"
```

```
count=0
```

```
for file in *.txt
```

```
do
```

```
    if [ -f $file ]
```

```
    then
```

```
        echo "$file found"
```

```
        count=$((count+1))
```

```
    else
```

```
        echo "$file not found"
```

```
    fi
```

```
done
```

```
echo "Number of files: $count"
```
